

7060 Tactical Flashlight

In a rare collaboration between public and private sectors, the City of Los Angeles Police Department (LAPD) has partnered with Pelican Products to develop the Pelican 7060 LED as the standard issue tactical/patrol flashlight for all its officers.

The Pelican 7060 LED light employs a revolutionary dual switch technology that allows the light to be activated by either a body-mounted patrol switch or a tail-mounted tactical switch. The dual switches, which include a momentary mode and high/strobe/medium/low beams, allows the user to grip the light in several positions and still control activation. In addition, the 7060 is self programmable. This allows the individual user to custom tailor the various modes to their liking. The light incorporates a rechargeable Lithium-Ion battery for maximum brightness and is also lightweight compared to standard batteries.

- Built Pelican tough
- Unconditional Lifetime Guarantee of Excellence

CONFIGURATIONS

7060 - Standard

7061B - With Flashlight with battery only

DIMENSIONS

Length: 8.65"

MATERIALS

Body: Xenoy

Lens: Polycarbonate (PC)

Shroud: Xenoy

COLORS

Black
